## **INTRODUCTION**

Since the establishment of the Judith River Game Range in 1940, the Montana Department of Fish, Wildlife and Parks (FWP) has conserved more than 927,000 acres of Big Sky Country. These lands and waters protect important fish and wildlife habitat; provide exceptional public access to our diverse lakes, rivers and streams; and offer quality recreational opportunities for anglers, hunters and others to enjoy the great Montana outdoors. FWP's land portfolio represents a legacy treasured by citizens from across Montana and throughout the United States.

The LAND INVENTORY provides an abbreviated record of the components of that impressive portfolio, listing each FWP site – wildlife management areas, state parks, fishing access sites, conservation easements, access rights-of-way, and other holdings – and providing a transaction-by-transaction summary of how these sites were acquired. The Land Book has been updated and published nearly every two years since 1956 to furnish this information about the lands owned and managed by the FWP. The information presented in the Land Book is backed up by detailed project files that house legal documents, maps, correspondence, land title information, financial records and due-diligence reports. Additionally, database programs managed by the FWP Lands Unit are available to facilitate access to data and to produce customized reports about FWP lands.

Site information in the LAND INVENTORY is grouped by the FWP's geographic Regions 1 through 7, along with Region 9 which covers administrative sites directly controlled by FWP Headquarters. Sites are listed alphabetically within each region, and each listing includes the total acreage for that site.

The LAND INVENTORY includes a number of features and appendices. A regional total of acres is included at the end of each region's section, while statewide totals are presented in the appendices. A site/region index is included to facilitate location of site information within the main body of the inventory. Complete legal descriptions and other site information is available from the FWP Lands Unit.

This LAND INVENTORY is deemed to be accurate based on the information available to us as of April 2018. However, some of the figures in this book may be approximations of more detailed information contained in the FWP permanent land records. Should you have any questions, please contact the Lands Unit, Montana Department of Fish, Wildlife and Parks, at (406) 444-3974.

## **TAX PAYMENTS**

MONTANA FISH, WILDLIFE AND PARKS  
2018 LAND INVENTORY

TAX PAYMENTS MADE BY  
THE DEPARTMENT OF FISH, WILDLIFE AND PARKS

In accordance with Section 87-1-603, Montana Code Annotated, the Department of Fish, Wildlife and Parks is required to make payments to counties equivalent to real property taxes on all of the land it owns, except for bird farms, hatcheries and state parks acquired before 2009. The Department is not required to make payments on real property in counties in which it owns less than 100 acres.

The Department has made these payments since 1951. The statute requires that these payments be made “in a sum equal to the amount of taxes which would be payable on county assessment of the property were it taxable to a private citizen.” The methods used by the counties to determine the value of the property, and the tax rates and the mill levies applied are identical to those used to assess private landowners. The money is used by the counties for schools, roads, fire protection, weed control, soil and water conservation and administrative purposes. Rural and special improvement districts charges are also paid.

Today, the Department makes payments on land in forty counties. In FY 2018 the Department will pay approximately \$850,300 to Montana counties. These funds consist of hunting and fishing license fees paid by Montana hunters and anglers, along with federal funds that support state fish and wildlife programs.

The following table shows the tax payments made by the Department for the past ten years.
